### OVERVIEW

The IntelliSHOT-M auto-tracking camera is Vaddio's first Certified for Microsoft Teams camera. Advanced IntelliFrame™ technology makes the IntelliSHOT-M camera ideal for auto-tracking presenters in boardrooms or perfectly framing a group of coworkers in a conference room. Pro AV Integrators can adjust the experience based on the room conditions and user's preferences. The IntelliSHOT-M camera provides a consistent, repeatable, and high-quality Microsoft Teams experience from Vaddio.

Other cameras on the market rely on facial recognition, and can fail with facial coverings or falsely identify objects like posters on the wall as people. IntelliFrame uses a combination of exceptionally sensitive motion detection and complex algorithms to deliver smooth, accurate and reliable participant framing.

AV Integrators can now promise personalized video performance with every installation. Because IntelliFrame is adjusted via the web interface, it can be fine-tuned remotely by support staff.

The IntelliSHOT-M is a great choice for conference rooms as people expect great video when joining their Microsoft Teams Room. The IntelliSHOT-M features 30x zoom making it a great choice for larger conference rooms or venues.

The IntelliSHOT is PoE+ powered and the network connectivity allows you to manage and control the IntelliSHOT via our web-based user interface.
