Part No.: [461849](#)

EAN-13: 0766623461849 | UPC: 766623461849

Two-in-one wall mount and VESA mount for your soundbar

When it comes to the look of your home theater, less is more. If you went for a clean and organized style by mounting your TV on the wall, Manhattan has the perfect matching mount for your soundbar. It can mount the speaker either on the wall, too, or on the VESA mount that's currently holding your TV. The latter also works with full-motion wall mounts - when you turn or tilt your TV, your soundbar moves with it, so the sound is always focused directly at you.

Mount it above or below your TV

No matter if you install it on the wall or the current VESA TV mount, you can position this Soundbar Mount above or below your screen to suit your setup for the best sound experience. It supports devices up to 15 kg (33 lbs.) and VESA standards up to 800x400. It works with fixed, tilting and articulating display mounts, as well as with TV stands.

Universal compatibility

Don't worry about finding the exact mount that only works with your particular soundbar model. Thanks to its adjustable holding brackets, this Manhattan Soundbar Mount works with virtually any soundbar from brands like Sonos[®], Bose[®], LG[®], JBL[®], Bang & Olufsen[®], Samsung[®], Sony[®], Yamaha[®], Sennheiser[®], Denon[®], Philips[®], Vizio[®] and many more.

Physical advantages

Soft foam pads on the holding brackets prevent vibration noise while protecting your expensive speaker from scratches. Powder coating with an attractive matte black finish complements most soundbar designs.

Features:

- Universally compatible mount for virtually any soundbar speaker up to 15 kg (33 lbs.)
- Can be installed on wall or on TV VESA mount, above or below the display
- Declutters your home theater for a clean, organized look
