Network Camera

Waterproof Cable Attachments

Anchors x 4

Screws x 4

Mounting Template

Quick Start Guide

Appearance

- ① RJ45 Network Interface (supports PoE)*
- ② Power Supply Interface (12V DC)
- ③ Infrared LED
- ④ Status LED
- ⑤ White LED
- ⑥ Built-in Microphone

⑦ Speaker

Note: Before inserting the micro SD card or resetting the camera, rotate the sphere and unfasten the two fixed screws to remove the cover.

⑧ Micro SD Card Slot
Insert a micro SD card for local storage. Initialize the SD card via VIGI app before recording videos.

⑨ Reset Button
Long press the button to reset the camera to factory settings.

Status LED Indication

Solid Red	Starting up
Blinking Red Slowly	Disconnecting from the internet
Solid Green	Working normally and connecting to the internet.
Blinking Green Quickly	Camera upgrading
Blinking Red Quickly	Camera resetting

*The camera's standard power supply is 12V DC (14W) or PoE (802.3af/at).

1 Mount Camera

Option 1: Wall/Ceiling Mounting

- Stick the mounting template to the desired mounting place. Drill 4 screw holes according to the template.
- Insert the anchors into the holes, use the provided screws to fix the camera's bracket to the wall or ceiling.

⚠ Note: Make sure that the wall is strong enough to withstand 3 times the weight of the camera and mounting bracket.

Option 2: Pole Mounting

- Thread each of the two cable ties through the slits on the back of the camera's bracket indicated below.
- Slip the two cable ties through the pole. Tighten them to firmly attach the pole.

Installing Waterproof Cable Attachments

Install the waterproof cable attachments for the network interface when the camera is installed outdoors.

Note: Make sure each part is securely attached and the waterproof rings are flush to keep out water.

- Route the network cable through the following components in order: fix nut, waterproof ring, and then the waterproof jacket.
- Fix the O-ring to the network interface of the camera and connect the network cables.
- Attach the network interface with the waterproof jacket, then twist to lock.
- Insert the waterproof ring into the waterproof jacket. Rotate the fix nut to secure it to the waterproof jacket.

2 Use Your Camera with an NVR

The camera works with an NVR for easier batch access and management.

*Here we use a VIGI NVR as an example.

Step 1. Connect the Hardware

Connect your cameras to the same network as your NVR (as shown above).

Step 2. Power On the Cameras

Power on your cameras with the PoE power supply or an external power supply.

Caution: The camera's standard power supply is 12V DC (14W) or PoE (802.3af/at). The power source should comply with Power Source Class 2 (PS2) or Limited Power Source (LPS) of IEC 62368-1.

Step 3. Add Cameras with the NVR

Before you start, make sure the NVR is working properly.

1. Right click on the Live View screen and click **Add Camera**.
2. Select your camera and click **+** to add your camera directly. If you have disabled Plug and Play on your NVR, create a password or use a preset password for your camera.

Note: If you can't find your camera, refer to FAQ-Q1.

😊 **Done!** You can now view live video and manage cameras.

Using your cameras with other NVR brands:

Step 1: Power on your cameras and connect them to the network.

Step 2: Activate the camera using the **VIGI Security Manager** or **TP-Link VIGI** app (refer to the next section).

Step 3: Refer to the NVR's User Manual to add cameras.

More Management Methods

You can also access and manage your cameras via any of the methods below.

Method 1: Via the VIGI Security Manager (Windows only)

View live video and modify camera settings on your computer.

1. Download the **VIGI Security Manager** on your computer at <https://www.tp-link.com/support/download/vigi-security-manager/>.
2. Install the **VIGI Security Manager** and open it.
3. Cameras on the same network as your computer can be automatically discovered. Go to **Settings > Discovered Devices**, click **+** **Add** to activate your discovered cameras by setting passwords, and follow the instructions to add your cameras.

Method 2: Via the TP-Link VIGI App

Remotely view live video, manage cameras, and get instant alerts.

1. Download and install the **TP-Link VIGI** app.

2. Open the **TP-Link VIGI** app and log in with your TP-Link ID. If you don't have an account, sign up first.
3. Tap the **+** button on the top right and follow the app instructions to activate and add your cameras.

Method 3: Via a Web Browser

View live video and modify camera settings via a web browser.

1. Find the camera's IP address on your router's client page.
2. On your local computer, open a web browser and enter **https://camera's IP address** (<https://192.168.0.60> by default).
3. Select your Country/Region and Time Zone.
4. Set a password to activate the camera.

Done. You can view the live video on the Preview page, and go to the Settings page to change camera settings.

Frequently Asked Questions (FAQ)

Q1: What can I do if no cameras are discovered?

- Refresh to discover your camera again.
- Make sure the camera is powered on.
- Make sure your camera and NVR/computer are in the same subnet. If not, use the **VIGI Security Manager** to set camera's network parameters.
- Try to add your cameras manually.
- For other NVR brands, make sure you have activated the camera by setting a password via the **VIGI Security Manager** or **TP-Link VIGI** app.

Q2: How do I reset the camera?

- Rotate the sphere and unfasten the two fixed screws to remove the cover. Long press the reset button until the Status LED starts blink red quickly.

For more questions, please refer to <https://www.tp-link.com/support/faq/2850/>

Q3: What should I do if I forgot the password of the camera?

- You can check the password of the camera via **VIGI NVR** or **VIGI Security Manager**. For more details, refer to NVR and Security Manager's User Guides.
- You can reset the camera and activate it again on the VIGI app. During the activation process, you can set a new password.

Q4: What should I do if the SD card is not working properly?

- Make sure you are using a micro SD card.
- Unplug the SD card and insert it again. Make sure you have inserted the SD card correctly.
- It's recommended to use a Class 10 micro SD card or higher, with storage from 8 GB to 256 GB.
- Make sure you have initialized the microSD card in **TP-Link VIGI** app.
- If the problem still persists, contact our technical support.
