

ThinkSmart View Plus

As the way we work continues to evolve, it's vital to stay connected and engaged, regardless of how and where we work. The innovative **ThinkSmart View Plus with the Microsoft Teams Display** is a hybrid work solution that enhances productivity, flexibility, and collaboration through personal and hotdesking experiences.

An integrated device with a 27-inch multi-touch display, premium video and audio, and built-in compute, ThinkSmart View Plus offers a customized, secure, and flexible Microsoft Teams experience, providing access to Teams chat, calendar, and files and enabling you to join meetings. This innovative solution seamlessly unlocks your PC and supports screensharing between devices to simultaneously view content and presenters. Plus, it easily shifts to monitor mode when connected to your PC through USB-C.

Users can hear and be heard more clearly with the detachable premium soundbar with two 5w speakers and four-mic array, while the detachable 4K IRGB camera with auto framing and AI security delivers crisp, clear images. And while in monitor mode, ThinkSmart View Plus allows for comfortable productivity with its ergonomic stand and convenient cell phone holder on the base.

Meet, share, and collaborate better than ever—wherever you are. Interact with impact with ThinkSmart View Plus.

**Smarter
technology
for all**

Lenovo

ThinkSmart View Plus

RICH COLLABORATION

Collaboration inspires innovation and fuels solutions. The ThinkSmart View Plus, with its anti-glare 27" FHD IPS multi-touch display with rich contrast, brightness, and color depth, invites engagement. The 4k RGB-infrared camera delivers crisp images, complete with auto-framing features and wide field of vision. Users can leverage the magnetic stylus or the touch of their finger to whiteboard big ideas. ThinkSmart View Plus ensures every meeting experience goes smoothly using key Microsoft Teams meetings features like call, chat, and channels.

IMPRESSIVE UX

ThinkSmart View Plus offers innovative features to optimize hybrid workforce productivity, including multi-mode functionality with detachable camera and soundbar. The adjustable monitor stand has height, tilt, and swivel for ergonomic comfort, while the optimized camera, audio, and display boost collaborative productivity. Plus, this device's high-quality content and video conferencing experience, AI facial recognition, and light indicators combine for an ideal personal or hotdesking experience. And when solo work is on the agenda, ThinkSmart View Plus easily transitions to monitor mode.

FLEXIBLE PRODUCTIVITY

ThinkSmart View Plus with the Teams Display is ideal for hotdesking, a hybrid work solution that allows employees to quickly locate and reserve flexible workspaces to touch down and make calls, set up ad-hoc meetings, or sign into their personal Teams experience. Shared hotdesking devices can be transformed to personal devices by simply signing in with personal credentials, allowing IT to capture occupancy and utilization insights to reduce costs and efficiently manage workspaces. Hybrid workers can book the ThinkSmart View Plus through Teams or from the device itself. Once signed-in, employees can enjoy smooth transitions from their home office to work office without a complicated setup, all while having a customized Teams experience. After users sign out, their personal information is removed from the device—so there's no security risk.

security

ThinkSmart View Plus delivers hardware-enhanced security and modern manageability to the personal collaboration experience. Facial recognition and a webcam privacy shutter, along with mic mute and meeting status light, ensure you are in control of privacy. Plus, with ThinkSmart Manager, IT teams can allow for BIOS/SVP change management, prevent unwanted USB port use, and manage passwords centrally for BIOS, Windows, and Microsoft Teams accounts.

sustainability

Designed to be a modular system, ThinkSmart View Plus allows users to upgrade individual accessories such as the camera and speaker over time without having to replace the entire product. Lenovo leads the industry in using post-consumer content (PCC) plastics, and View Plus is designed with as many as-molded plastic parts as possible, taking unnecessary steps out of the manufacturing process and making these parts easier to recycle at the end of the products life.

ThinkSmart View Plus

Use Cases

Executive desk, telehealth, remote learning, and phone booth

Virtual reception, hoteling, and hotdesking

Small rooms for video conferencing and healthcare consultations

Microsoft Teams Displays

Microsoft Teams displays are a category of dedicated Teams audio/video devices that feature customized Teams experience for personal and shared use, enhancing end-user productivity and collaboration.

- Seamless hotdesking for cloud-based productivity.
- Access to all core Teams features.
- Always-on glanceable displays for an ambient experience.

THINKSMART MANAGER

ThinkSmart Manager is a versatile cloud-based software that provides a single-pane-of-glass view of an organization's entire ThinkSmart fleet and empowers IT teams to work from anywhere. ThinkSmart Manager allows IT teams manage all ThinkSmart compute devices and accessories, get real-time diagnostic stats, and run reports.
