

Car Dashboard Mount with Magnetic Phone Holder

Universal Phone Mount with Safe-to-Use Magnet and Suction Cup for Car Dash, Horizontal and Vertical Use, Black

Part No.: [462525](#)

EAN-13: 0766623462525 | UPC: 766623462525

Car Phone Mount with Magnet for Convenient Display on the Road

The Manhattan Car Dash Mount with Magnetic Phone Holder ensures the secure and convenient display of your smartphone even through the bumps and turns of the road. An adhesive suction cup firmly holds the mount on your dashboard.

A Magnetic Holder as the Smart and Universal Mount Solution

Save yourself the trouble of fiddling with your phone to fit it into the cradle of your car phone mount – just place it effortlessly on the magnetic pad with one hand. The cradle-free design eliminates any size limitations; even the largest XL phone model will fit seamlessly. The powerful magnetic module ensures it stays firmly in place.

Why A Magnet is Safe and Will Not Harm Your Phone

The concern about adverse effects from magnets on devices typically arises from the fact that traditional hard disk drives (HDDs) in computers use magnetic storage and have moving mechanical parts, making them susceptible

to magnets. However, this is not the case with smartphones. Modern phones like the Apple® iPhone, the Samsung® Galaxy, or other Android phones have storage components based on flash memory (NAND memory), which is not affected by magnets at all. Moreover, all other internal components in your smartphone, including their lithium-ion batteries, lack magnetic properties. That's why they cannot be harmed by a magnet.

Display in Any Orientation

Switch effortlessly between portrait and landscape modes with just one hand. Whether you're setting up your playlist or answering a call in portrait orientation, a simple twist will transition you seamlessly to landscape mode for navigation.

Features:

- Magnetic, cradle-free design for a universal mount, suitable for all phone brands and sizes
- Durable, adhesive suction cup with quick-release fixes securely to a dashboard
- Ball joint offers 360° rotation for horizontal or vertical orientation and swivels directly toward the user
- Powerful connection with eight magnetic modules keeps your device safely in place while driving
- Magnet is safe to use and will not interfere with any of your phone's components
- Included metal pad with adhesive tape allows for mounting thick protective phone cases
- Easy to apply and remove without residue
- Compatible with Apple MagSafe® accessories
- Three-year warranty

Specifications:

General

- Certifications: RoHS
- Rotation: 360°
- Swivel: +/-20°
- Magnetic pad dimensions (L x W x H): 51 x 39 x 6 mm (2 x 1.53 x 0.24 in.)
- Mount dimensions, fully extended, including suction cup (L x W x H): 225 x 75 x 33 mm (8.86 x 2.95 x 1.3 in.)
- Net weight: 180 g (0.4 lbs.)
- Gross weight: 210 g (0.46 lbs.)
- Materials: metal and plastic

Package Contents

- Car Dashboard Mount with Magnetic Phone Holder
- Metal pad with adhesive tape for thick phone cases
- Instructions

Note: The suction cup has adhesive properties for an even safer and firmer hold. To clean it, simply rinse with water and allow it to air-dry completely before reapplying. Avoid wiping it dry with paper or cloth.
