Designed for Professionals

Despite its slim lightweight design, we haven't compromised on the Echelon Keyboard's typing experience, with full-size, comfortably-spaced keys that make composing long documents quick and accurate.

Meanwhile, the compact Echelon Mouse's ergonomics chassis helps keeps your hand cramp-free after a long day.

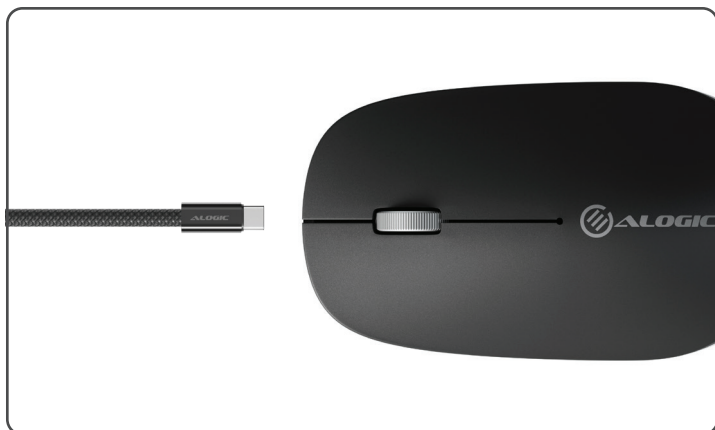

Designed for Windows Productivity

The Echelon keyboard features a number of custom shortcuts, such as single-key cut, Copy and Paste Keys above the Numpad for use when number crunching and OS shortcuts like Emails, Calculator and search.

Designed for the Modern Office

Perfect for hybrid work, the home office and hot desking, the Echelon Mouse and Keyboard can quickly switch between three connected devices at the touch of the button, including laptops, phones and tablets.

No Batteries Needed

Echelon features an integrated, USB-C Charging battery which lasts weeks between charges, saving you the expense and hassle of swapping batteries in and out.

Physical Characteristics

Product Dimensions	Mouse: 110mm (L) x 63mm (D) x 29mm (H) Keyboard: 427mm (L) x 126mm (D) x 14mm (H)
