Torrent Nano

Streamlined airflow

The Torrent Nano is built to air cool your small build as efficiently as possible. Main standouts include an unobstructed base intake, an open front grille and one of our 180 x 38 mm Dynamic PWM fans (Prisma for RGB version) custom-made to achieve maximum air cooling while maintaining controlled noise levels. Enabling highly efficient cooling with or without a water-loop, the Torrent Nano is a perfect fit for air cooling aficionados looking for a small case.

Key features

- Fan and LED lights on TG versions fully controllable through motherboards supporting addressable RGB (5V)
- RGB TG version includes a 180 mm Prisma ARGB PWM fan
- Seamless tempered glass panels with bolt-free top-latching mechanisms for easy handling
- Front fan brackets allow for unblocked airflow to the larger fan while catering to standard radiator sizes
- Removable top bezel and routing clips with velcro ties make for easy installation and cable management
- A sturdy, vibration-damped drive tray supporting a single HDD or dual SSDs with two optional mounting positions
- A dedicated SSD bracket with room for 2x 2.5" drives included
- Three bridgeless expansion slots
- The GPU is situated just above the bottom air intake, allowing it to breathe
- GPU support bracket that helps your GPU stay level
- Dust filters for front and bottom easily accessible by removing the front
- Integrated support for a water-cooling reservoir on the motherboard tray
- Includes a PWM fan (180 mm) for balancing performance, cooling and noise
