Premium Performance

Single link DVI officially supports 1920 x 1200 [165MHz] resolutions, but ALOGIC's HDMI to DVI Cable hits HDMI 1.4 bandwidth limits of 340MHz. That's right – they provide more than double their official support requirements, ensuring users can connect their devices to superior quality displays.

User-Friendly Cables for Home and Business

Engineered with professional applications in mind, the HDMI Cable to DVI Cable utilises highly flexible 30AWG cable for reliable performance and easy installation at home or in business settings. It's PVC-moulded, low-profile connectors are comfortable to grip, simple to insert, and robust enough to stand up to use in high traffic environments.

Proven to Stand the Test of Time

With hundreds of thousands of our cables installed in professional environments, this range is developed out of our vast experience providing products that last the test of time in the most demanding environments. Whether at home or in the office, rest assured these cables outlast others.

User Interface

Input HDMI Video (Male)
Output DVI-D Single Link (Male)

This cable supports digital DVI signals (DVI-D/DVI-I interfaces)

Resolution Support
