### 100W Rapid Charging

When used with USB-C devices that support USB-C Power Delivery (USB PD) these cables support up to a massive 100W of power for charging devices (20V/5A - the maximums possible for USB PD 3.0). This makes them suitable for charging nearly all laptops that support USB PD. When the USB-A adapter is used with the cable, the cable can be used for charging smaller devices with up to 12W of power (including Apple 5V/2.4A fast charging).

### Full Featured, Fast Data Transfer

These cables are USB 3.2 Gen 2 compliant, offering high data rates up to 10Gbps. In addition to providing power and data transfer they are able to be used for USB-C video applications (not possible when the USB-A adapter is used with the cable).
