## SR898-EUK

| Mounting Pattern | Max Load |
|---|---|
| 200 x 200 up to 900 x 600mm | 300lb (136.1kg) |

# SMARTMOUNT®
# Flat Panel Trolley
## FOR 55" TO 110"+ DISPLAYS

The SR898 SmartMount® Flat Panel Trolley provides all of the necessary features to support your mobile display deployment, whether that's in a boardroom or a classroom. The minimalistic, tubular design provides a clean aesthetic by hiding all cabling through the internal structure. The trolley also includes a IEC pass through cable that is neatly stored in the rear hinging compartment. This protects the cord from damage, but also makes moving your display from room-to-room a breeze. The rear ABS molded cover helps hide any cabling, media players, or mini PCS, which means behind the display will not look cluttered if the trolley is placed where the back is visible.

- Improved leg design offers better movement around the display, such as when using a touch display or presenting to an audience

- Tube design and spacing allows for an easier way of transporting the display thanks to flexible handling locations

- 813 x 279mm fixed shelf provides a convenient place to set laptops, notebooks, pens, etc.

- Optional ACC-UCM accessory can be added to the rear of the trolley for mounting of additional AV devices

- Tested to UL Standards

- Includes preinstalled IEC Cable

Included IEC cable is preinstalled through the trolley tubing (C13 at top)

**REMOVABLE REAR COVER**
Sits behind the rear of the display and provides a clean, concealed area for managing cabling and components (Shelf is made of ABS plastic; materials do not degrade WiFi signals)

**HEIGHT ADJUSTMENT**
Allows displays to be positioned 1.25m to 1.65m from the floor

IEC cable exits the trolley tubing and is managed at the rear of the trolley (C14 at bottom)

**HIDDEN CABLE MANAGEMENT**
Hinged rear cover provides hidden storage for the power cable when moving or storing the trolley

**SAFE AND EASY MANEUVERABILITY**
4" (102mm) dual-wheeled casters (two locking) allow the trolley to easily move across tile, carpet, and thresholds

Complies with ADA Standards for Accessible Design, Section 308

The frame design of the trolley is optimized for storing multiple trolleys in a reduced footprint

The leg design allows the trolley to easily pass through doorways as small as 30" (762mm) wide
